Subject Purchase Order No 250-07126

Dear Ken

Justification for selecting Dube Construction Company to renovate the Elkem property behind 166 building is as follows:

1. Dube Construction did the original excavation of the contaminated soil and backfilled with clay in 1984.
2. Umetco has had Dube Construction under contract for several years but the contract was transferred to Stratcor at the time of the sale.
3. In past years when earth moving jobs were bid, Dube Construction was consistently the low bidder.

The estimated cost for the restoration of the Elkem property was \$18,500. I am also using Dube Construction to grade and backfill a lake east of No. 6 Furnace Room. Recently I have had Dube Construction remove radioactive waste from the property. I would like to charge all of these items against P O. No. 250-07126. I suggest that we write the order "Not to Exceed \$25,000".

Very truly yours,

D. J. Hansen

PO BOX 579, 4625 ROYAL AVENUE • NIAGARA FALLS, NEW YORK 14302

July 15, 1986

Mr. R. A. Crago  
Elkem Metals Company  
4625 Royal Avenue  
Niagara Falls, NY 14302

Dear Mr. Crago:

Mr. Louis Cabasino of the New York State Department of Labor, Brooklyn, NY called me this morning to inform me that the soil samples taken south of Building 166 showed no evidence of any radionuclides. These samples were obtained by Mr. Robert Kelly, Department of Labor, on March 20, 1986, to verify that removal of contaminated soil in 1984 was complete. Because of the results, Mr. Cabasino agreed that we could proceed to restore the area.

I have contacted Dube Construction Company and requested a bid to remove 8-inches to one foot of clay and to backfill with crushed stone. Assuming the cost is reasonable we will proceed with the restoration later this summer. The work will be completed before September 30, 1986.

Very truly yours,

  
D. J. Hansen
